Hans Aaron Laureles

APPLIED AI ENGINEER & FULL-STACK BUILDER

Cavite, Philippines · hanslaureles92@gmail.com · hanslaureles.vercel.app · github.com/hanslaureles · BS Computer Science (DLSU-D)

PROFESSIONAL SUMMARY

Computer Science graduate (BS CS, De La Salle University–Dasmariñas, 2021–2025) building applied AI workflows, multi-agent systems, and full-stack web applications. Experienced in orchestrating cloud and local LLMs (Groq and Gemini, with an optional local Ollama mode), developing automated tool pipelines in Python, and building responsive, accessible interfaces with React, TypeScript, and modern CSS.

PROFESSIONAL WORK EXPERIENCE

UI/UX & Frontend Engineer Intern · ROC.PH Digital Marketing Services (roc.ph) · General Trias, Cavite, Philippines — June 2024 – August 2024

- Designed and prototyped responsive web and mobile interfaces in Figma, strictly applying Nielsen Norman Group usability heuristics and design token standards.
- Translated design specifications into accessible, semantic HTML5, modern CSS, Tailwind CSS, and React components deployed across production client sites.
- Partnered within cross-functional agile sprints, participating in daily standups, design reviews, Git version control workflows, and rapid client feedback turnaround loops.

FEATURED ENGINEERING PROJECTS

Manas: Ciel — Voice AI Copilot & Real-Time Cognitive HUD · Solo Project

Built a bilingual JA/EN voice copilot: FFmpeg audio at 16 kHz mono, Groq Whisper with an OpenAI fallback, and Edge-TTS through a custom voice filter that speaks each sentence as it is written (time to first audio 4.60 → 1.41 s p50, N=10), plus web search, note tools and a WebSocket HUD.

LSFM AI HQ — Autonomous Multi-Agent Operations System · Solo Project

Architected 5 asyncio Discord agents with per-agent Groq/Gemini models and cross-provider fallback (optional local Ollama mode), hybrid RAG (Gemini embeddings + BM25, fused with RRF), a headless-Edge ATS resume builder, and OAuth2 Gmail triage across 10 labels.

Patriot — University Community Matchmaking Mobile App · BS Computer Science Capstone

Engineered a cross-platform matchmaking app in React Native/TypeScript with AWS Lambda, DynamoDB and Cognito, Redis caching for session state, and interest-based matching.

Cognitive Memory Core — Lessons-Learned Memory for AI Coding Assistants · Solo Project

Built a zero-dependency lessons-learned memory for AI coding assistants in the Python standard library: field-weighted BM25 recall before each task (0.81 ms p50 on a 10-entry store) and repeated lessons compiled into rules.

EDUCATION

Bachelor of Science in Computer Science (BS CS) — 2021 – 2025

De La Salle University–Dasmariñas (DLSU-D)

Distributed Systems, Algorithms & Complexities, Software Engineering, Database Management Systems, Human-Computer Interaction (HCI), Object-Oriented Programming.

TECHNICAL PROFICIENCIES & CAPABILITIES

AI & LLM Orchestration:	Multi-Agent Workflows, Web Search Tools (DDGS), Voice Pipelines (Whisper STT, Edge-TTS, FFmpeg filters), Hybrid RAG (Dense + BM25, RRF), Local LLM Inference (Ollama), Cloud LLM APIs (Groq, Google Gemini, OpenAI Whisper), Tool & Function Calling, Structured JSON Output, BM25 Retrieval
Languages & Backend:	Python 3.11 (asyncio, OOP, pure standard library), TypeScript, JavaScript (ES6+), Node.js, Express, aiohttp, REST APIs, WebSocket, OAuth2, Headless Chromium Automation, Git / GitHub
Frontend & Design:	React.js, React Native, HTML5, Modern CSS3, CSS Custom Properties & Design Tokens, Web Audio API, Canvas 2D, Tailwind CSS, Responsive Web Design, Cross-Browser Compatibility, Figma (Auto-layout, Components, Variants, Design Tokens), Wireframing, Information Architecture, WCAG 2.1 Accessibility Standards, Usability Testing
