

PROFESSIONAL SUMMARY

Computer Science graduate (BS CS, DLSU-D 2021–2025) building applied AI workflows, multi-agent systems, and full-stack web applications. Experienced in local and cloud LLM orchestration (Ollama DirectML, Groq API), automated Python tool pipelines, and responsive interfaces with React and TypeScript..

PROFESSIONAL WORK EXPERIENCE

UI/UX & Frontend Engineer Intern · ROC.PH Digital Marketing Services

June 2024 – August 2024 · Cavite, PH

Designed and prototyped responsive web and mobile interfaces in Figma using design token standards and usability heuristics. Translated specifications into accessible, semantic HTML5, CSS3/Tailwind, and React components across production client applications within agile sprints.

KEY TECHNICAL IMPACT

- Orchestrated 5 concurrent autonomous agent daemons over Discord Gateway with hybrid local/cloud LLM failover at \$0.00/month cloud compute cost.
- Engineered lightweight episodic memory engine in pure Python standard library using BM25 heuristic retrieval to query past context and engineering rules.
- Built programmatic tool pipelines including headless browser ATS single-page resume compilation and Google Workspace OAuth2 inbox triage.
- Developed responsive, accessible web components in React and modern CSS during commercial internship at ROC.PH.

FEATURED ENGINEERING PROJECTS

- LSFM AI HQ
- Autonomous Multi-Agent Operations System · Solo Project
- Architected 5 Discord agent daemons with hybrid local AMD DirectML / Groq Cloud failover, headless PDF compiler, and OAuth2 inbox triage.
- Patriot
- Community Matchmaking Mobile App · DLSU-D Capstone (Lead Mobile Developer)
- Engineered real-time mobile app in React Native/TypeScript with AWS Lambda, DynamoDB, Redis caching for session state, and multi-criteria matching.
- Cognitive Memory Core
- Episodic Memory Retrieval Engine · Solo Project
- Engineered zero-dependency episodic memory retrieval in Python standard library using BM25 keyword relevance scoring for pre-flight task context.
- Aura Coffee & Kitchen
- Specialty Commerce Storefront · Full-Stack Project
- Built client-side drink configurator modal, real-time sliding bag drawer, and 1-page checkout tailored for GCash, Maya, and QR Ph.

EDUCATION

Bachelor of Science in Computer Science (BS CS)

2021 – 2025

De La Salle University–Dasmariñas (DLSU-D)

Distributed Systems · Human-Computer Interaction · Algorithms & Complexities

TECHNICAL PROFICIENCIES & CAPABILITIES

AI & LLM Orchestration:	Multi-Agent Workflows, Local LLM Inference (Ollama, DirectML, GGUF), Cloud LLM APIs (Groq, Anthropic, OpenAI), Tool/Function Calling, Structured JSON, BM25 Retrieval
Languages & Backend:	Python 3.11 (asyncio, OOP, standard library), TypeScript, JavaScript (ES6+), Node.js, Express, REST APIs, OAuth2, Headless Chromium, Git/GitHub
Frontend & Design Systems:	React.js, React Native, HTML5, Modern CSS3, Design Tokens, Tailwind CSS, Responsive Web Design, WCAG 2.1 Accessibility, Figma
